Acknowledgment of Priority Papers

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers

Page 2

have been placed of record in the file.

Objection to the Claims

Claims 1-18 are objected to under 37 CFR 1.75(I) which requires the use of indentations

separating the elements of a claim.

Rejections based on 35 U.S.C. 112, second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 and 14-16 are rejected under 35 U.S.C. 112, second paragraph, as being

indefinite for failing to particularly point out and distinctly claim the subject matter which

applicant regards as the invention.

In claim 1, line 2, the "in particular" limitation is not understood. In line 9, there is no

antecedent basis for "the sleeve wall."

In claim 3, line 2, the "in particular" limitation is not understood. In line 3, it is unclear if

"its" is in reference to the "instrument" or the "media line." Additionally, claim 3, is very

awkward and confusingly written. It is difficult to understand.

7

In claims 7 and 14, the "e.g." limitation is not understood. Is the "plug pin" a requirement of the claim or not?

Rejections based on Prior Art

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Murken (US 4,806,248).

Murken discloses a filter unit for a media line wherein the filter element has a filter sleeve 60. The filter element is arranged in a cartridge 21. In regard to claim 5, note plug connections 24 and 25.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen

(5,897,317) in view of Murken (US 4,806,248).

Hansen discloses a dental handpiece with disposable filter cartridge 22. The Hansen filter

Page 4

cartridge appears to lack the claimed sleeve element. Filter cartridges with sleeve elements,

however, are well known in the filtering art as evidenced for example by Murken. Replacing the

Hanson filter cartridge with another known type of filter cartridge would have been obvious to

one of ordinary skill in the art as an obvious substitution of equivalent filter structures.

Prior Art

Applicant's information disclosure statement of 21 February 2002 has been considered

and an initialed copy enclosed herewith.

Raines et al (4,021,353), Murken (4,707,262), Murken (4,894,156), Kawata (5,380,201),

Kluhsman (5,536,402), Bulard et al (5,630,939), Novak (5,716,210) and Kinsel (5,749,726 are

made of record.
